

advanced power

From the CEO

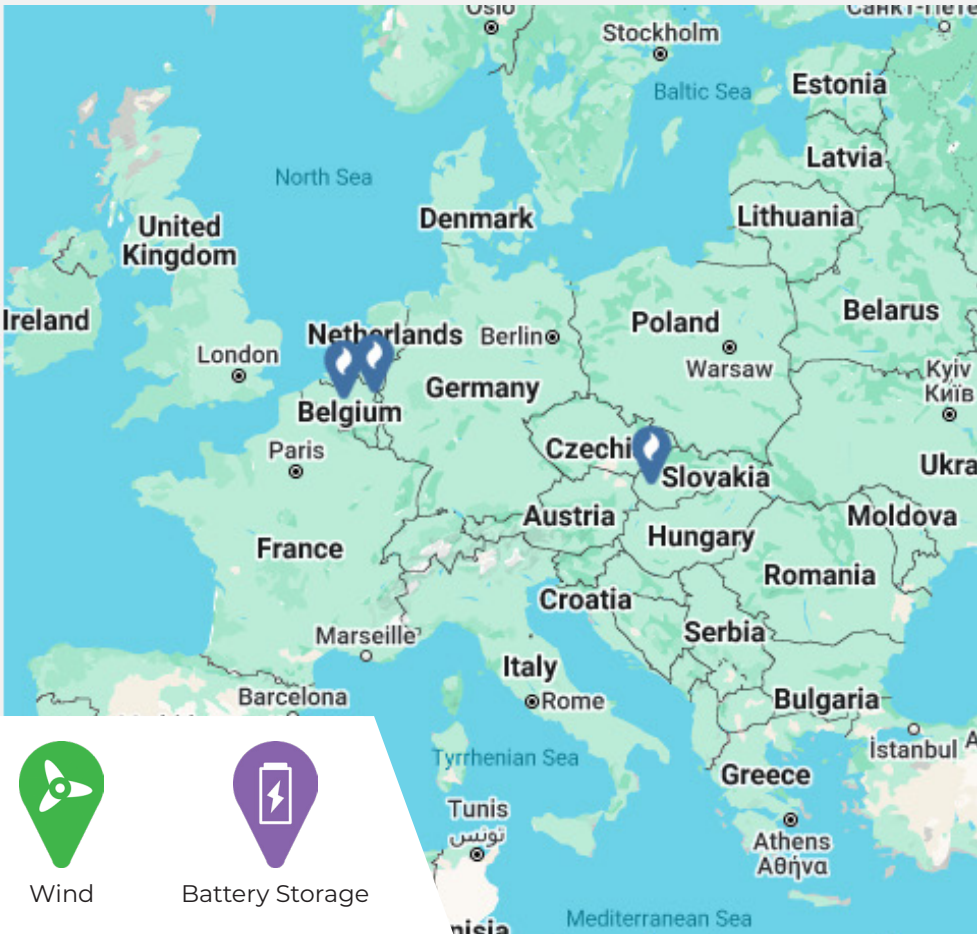

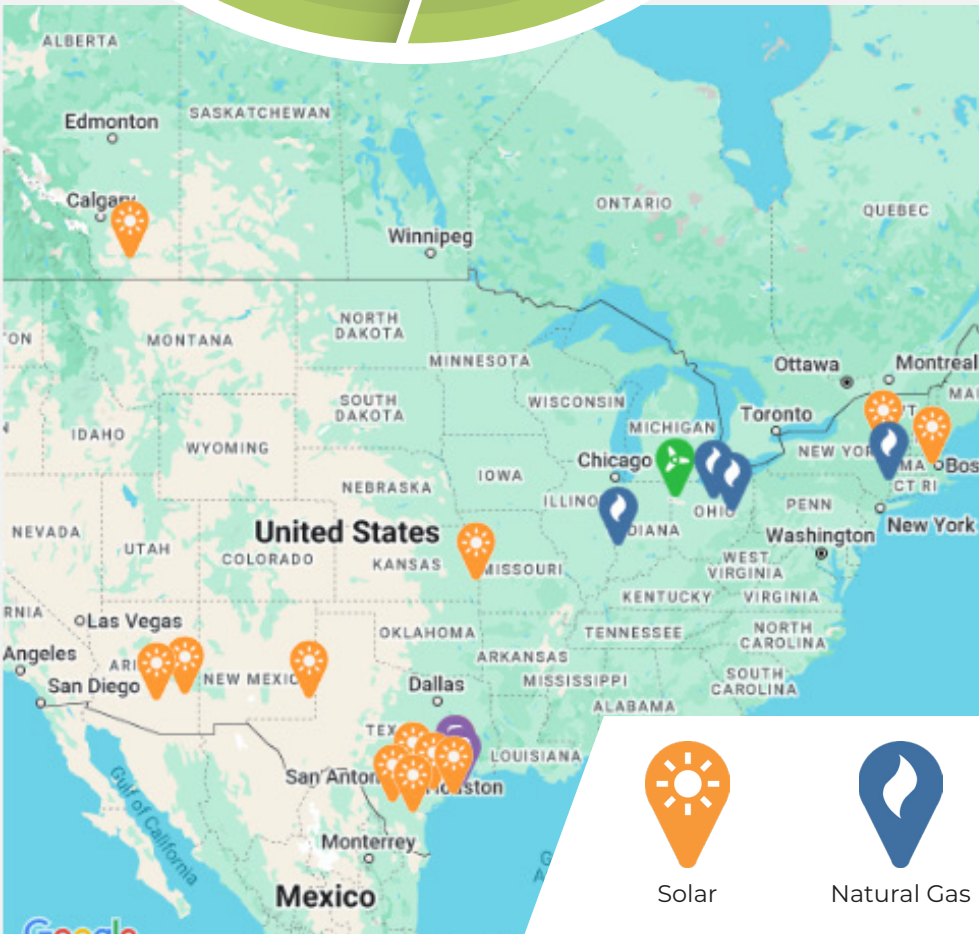

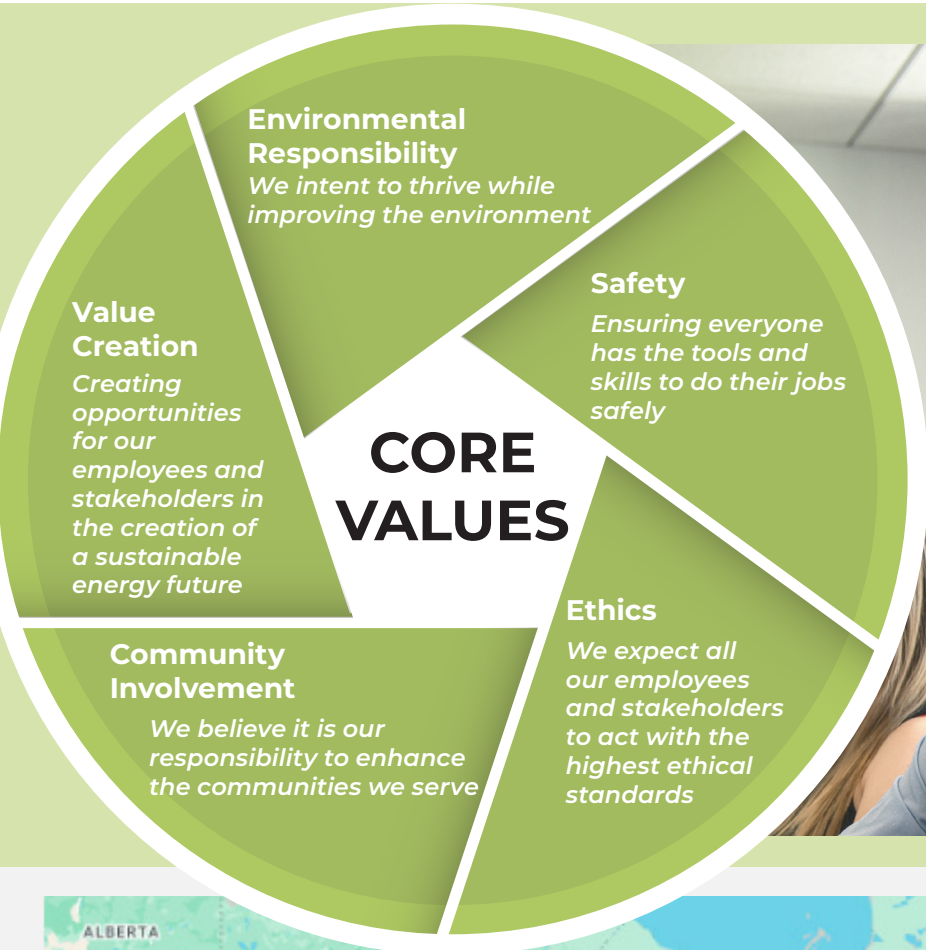

There has never been a more exciting time to be in the energy industry or to choose a career path that leads you to Advanced Power. As the commitment to advancing a reliable, sustainable energy future strengthens and grows, so does our company.

I'm proud to have co-founded an organization focused on the world's priorities. Our mission as a global developer, manager, and owner of modern power infrastructure, is the displacement of heavily emitting power plants to ensure efficiency, decarbonization, cost-competitiveness, and reliability.

Of course, it's people that power our present and our future. That means our focus on sustainability includes readying the talent to fill the clean energy jobs of tomorrow.

We're excited about our results so far – avoiding about 41 million metric tons of CO2 emissions worldwide – and the bright energy future ahead. Thank you for your interest in sustainable energy. Please keep Advanced Power in mind as you continue on your career journey.

Tom Spang, CEO

Battery Storage

At Advanced Power, we share a powerful purpose: advancing a sustainable energy future. We’re in search of candidates for employment who are interested in contributing to the rapid reduction of global emissions.

Founded in 2000, Advanced Power is a privately owned company that develops, owns, and manages low and no emission power generating facilities and related infrastructure projects throughout Europe and North America.

We are advancing and rapidly reducing global emissions through development, financial structuring, and asset management expertise. We have a clear vision for cleaner energy and seek better ways to have a cleaner future. We are devoted to this vision.

See what our employees in some vital roles have to say:

“I like Advanced Power’s adaptability to new technologies that facilitate the sustainable energy future and add to the reliability of the grid.”

- Harsh Agarwal, Manager, Capital Markets and Investments

“Advanced Power has truly brilliant people who support my growth and inspire me every day. The teamwork here makes every experience feel rewarding.”

- Maggie Upham, Senior Associate, EHS & ESG

“It’s great to work in an open-minded, constructive, and respectful environment where input is welcome.”

- Patrick DelDuco, Manager, Engineering

There are so many career opportunities in the energy industry, we couldn’t list them all. Here’s a sampling:

- Accounting
